**January 21, 2013, 2:05 PM**

Banyan Air Service at Fort Lauderdale Executive Airport (FXE) in Florida is offering cockpit crews the opportunity to experience the effects of smoke in the cockpit firsthand in its new emergency vision assurance system (EVAS) simulator. The EVAS simulator is a self-contained unit with one seat, theatrical smoke and a filtration system. Participants don a pair of goggles, then experience the situation as smoke invades the cockpit. Demos begin January 25.
